

The Guardian Voice

Quote of the Quarter

“Big jobs usually go to the men who prove their ability to outgrow small ones.”

-Theodore Roosevelt

Quick Stat/Fact:

△ The hurricane season is from June 1st to November . 30th.

△ A Category 5 hurricane is strong enough to completely destroy mobile homes and even some buildings .

△ A Hurricane is actually the same thing as a typhoon, depending if it starts in the Atlantic Ocean or Pacific Ocean.

Accel Provides Powerful Improvement for the City of Breaux Bridge

On April 27th, 2009, Accel Protection & Technologies delivered a brand new 400 kW Taylor Power Generator for the City of Breaux Bridge to replace an older unit. It replaced a 175 kW generator which failed to perform during Hurricane Gustav last year. With the assistance of E. P. Breaux Electrical on the project, Accel has provided a powerful backup unit that allows for automatic start up, power transfer, and remote generator monitoring, a brand new feature offered by Accel (For more details on remote generator monitoring, see below). Accel is proud to offer its services to Mayor Jack Dale Delhomme and the City of Breaux Bridge and grant them the peace of mind that comes with doing business with Accel.

Allow Accel Protection & Technologies to keep you safe and secure this upcoming hurricane season!

Remote Generator Monitoring

Remote generator monitoring allows select residential units to send an email or text message to the owner of the unit if their generator is running or if there is a problem with the generator. Other features available for larger units are generator startup, power transfer, generator shutdown, as well as low fuel , high engine temperature, low oil pressure, and over crank message alerts all sent directly to you via text message or email.

Depending on the application and logistics, this service can be hard wired or wireless, which ever is more convenient for you. This is just one of the many ways that Accel proves that it is a leader in the security industry, we strive to continuously offer new methods of protection through advances in technology.

Remote Video Monitoring

In addition to our conventional alarm monitoring plans, Accel offers remote 24/7 monitoring of video and access control systems. Our central station operators are on-duty, 24 hours a day armed with the most advanced monitoring software systems that can interpret today's complex security systems. We can monitor most existing systems or can design one to fit your exact remote monitoring needs. Our remote monitoring services acts a guard force multiplier by providing your current guard forces with additional non-unmanned tours and inspections through the electronic systems. Our operators can conduct random or timed inspections of specific posts which otherwise would require extra manpower, unavailable with existing staffing.

Key Features/Benefits:

- Real-time alarm notification and live interactive monitoring
- Video verification of alarm events
- 2-way audio capability (listen & speak) to deter robbery
- Virtual guard patrols and alarm activation scheduling
- Send instant alerts and video/audio clips to any device
- System can easily integrate with any video technology on the market
- Secure, remote access from any location, using any device
- View live cameras via the Internet or watch and listen to previous events
- Easy-to-use interface with online reports, event history and remote storage

Are You Getting the Most From Your Video Surveillance System?

Client Testimonials

"Accel offers a complete package of protection services. As a manager I am impressed with a company that keeps in regular contact with me and continually strives to fine-tune its service."

-Jill Zimmerman - Executive Vice President

"Accel employees were very dependable and courteous. They were a great asset to our company in a time of great need."

Safety Corner - Generator Safety

- Never plug a portable electric generator into a regular household outlet. This can energize “dead” power lines and injure neighbors or utility workers.
- Connect individual appliances that have outdoor-rated power cords directly to the receptacle outlet of the generator, or connect these cord-connected appliances to the generator with the appropriate outdoor rated power cord.
- Never use a generator indoors or in an attached garage, a portable generator uses an internal combustion engine that emits deadly carbon monoxide.
- Be sure to place the generator where exhaust fumes will not enter the house and only operate it out doors in a well-ventilated, dry area, and away from air intakes to the home.
- To prevent electrical shock, make sure your generator is properly grounded. See manual.
- Turn off all equipment powered by the generator before shutting down your generator. Keep children away from generators.

Accel Team Member Spotlight

Bryan Collette has worked for Accel Protection & Technologies for two years and brings a lot to the company by having twenty years of electrical work experience and six years of experience with generators. Bryan is a key player at Accel as he is our Emergency Generator Director and has many qualifications including being licensed by the State of Louisiana and holding his Metro code license. Bryan continues to be a dedicated worker making sure that the job gets done in a professional and hospitable manner.

Accel is proud to acknowledge such a valuable team player!
